## (54) COMPUTER DEVICE

### (57)Abstract:

**PROBLEM TO BE SOLVED:** To enable unspecified and many persons to gather and process information optionally by using computers by performing various processes according to the result of a use condition confirming process, generating a history information corresponding to the processes, and recording it on a recording medium by a recording medium drive means.

**SOLUTION:** When it is judged that a public terminal is used for registered payment, information on the charge demanded of a user is sent to a charging server 2a. The charging server 2a demands the charge of a credit card company 3 according to the information. According to the information, the credit card company 3 withdraws and pays money to respective organizations such as a public terminal management company 2, a content company 4, and an application company 5 from the account of the user. The computer writes use history information and charge history information on necessary contents on a disk according to the use contents of the public terminal 1. Then, the disk is ejected and the keyboard is stored, so that the process is completed.
